One of our subscribers in renewing writes as follows: "Enclosed M. O. for two dollars for subscription to Advertiser. My paper is nearly worn out in Portsmouth and what is left is borrowed in Kittery."

It is said: There is a certain person who lives in Oxford County who listens to "Hester's" windows. The saying is "Hester's never hear any good of themselves" and in this case, the writer stated, "I guess this party didn't."

Sent in: People who attend Sunday evening services and lectures for what enlightenment and enjoyment they can get, are wondering why some of the young people who make a disturbance with various noises, care to go when they evidently have no respect for the church, the speaker or the audience. If they arrive late, they slam the door and come in with great gusto, disturbing everybody. Some cheer and giggle and whisper through most of the meeting until those around them wonder where are their manners.

A Norway party writes: A problem that has bothered many local residents is the night noises. There are some who find it necessary to sleep during a certain portion of the night, but find it next to impossible with the continuous racket made all night by automobiles. There seems to be no respect for late hours and trucks and pleasure cars alike put on their "cut-outs" seemingly delighting in making all the noise they can. It would seem that those who have to travel at night might exercise a little care in operating their motor vehicles instead of advertising that they are out and disturbing many others.

J. W. Haslam, a summer visitor, of Westfield, N. J., writes Game Warden Jas. Walker of Welchville, Me., as follows:

"In a paper from Norway about two or three weeks ago I saw an item that the Norway Fish and Game Association have authorized the expenditure of \$100.00 for work on the dam at Sand Pond."

"I am interested to know whether it is the Sand Pond that Ralph Martin and I fish in, just back of Norway Lake and under Frost Hill, or whether it is some other spot. I am also anxious to know in the event that it is Sand Pond under Frost Hill, what they are going to do, that is, to what extent are they going to raise the level of the lake?"

"I have some very, very pleasant recollections of time spent there, particularly before the dam broke or was broken out and I feel so friendly to that spot that I was wondering if the Norway Game Association would accept from an outsider like me, say a ten-spot toward the work."

"I read with a great deal of interest from time to time of your movements through the columns of the local paper and congratulate you on the vigilance that you always maintain and the complete absence of any criticism of you which anyone in your position could be very readily subjected to."

"I am looking forward to next spring; in the meantime, I hope all of your good people are enjoying the best of health."

You are right. Sand Pond where you fish is the place. We are sure a contribution would be acceptable and carefully expended. On account of high water, the proposed dam and screen at the outlet have not been put in this fall.

At the present time the state of Maine appropriates annually \$140,000 and cares for 800,000 people.

The causes and aids for several diseases, such as diphtheria and scarlet fever were carefully described. In closing, Dr. Coombs said that it was well for students to be acquainted with the various diseases, as a great deal depends on the teachers in helping check them.

C., also a representative of the International Prohibition Agency of the International Student Body and faculty, addressed the student body and faculty, Friday morning, on the subject, "Canadian Systems of Control of the Liquor Traffic." Dr. Spence was very much in favor of the present system used by the United States on this question and was very decidedly against her adopting a system similar to that maintained in Canada.
